MyAHK.exe

Richard Frost © Copyright 2013

Although many of the contributions to MyAHK.exe were written by me, I have been influenced by the works of many others. Credits and thanks to all those who have contributed to the AutoHotKey community.

Installation Instructions

MyAHK.exe must be placed in a trusted location such as "C:\Program Files\". The executable will not run on until you install the digital certificate (Only needs to be done once):

1. Open the properties for the executable.
2. Click on the "Digital Signatures" tab.
3. Double-click the Signature.
4. Click on **View Certificate** and then click **Install Certificate**.
5. Choose "Current User" and follow the wizard to install it.
6. Choose "Place all certificates in the following store" and click **Browse**.
7. Select the "Trusted Root Certificate Authorities" and then click **Okay**.
8. Optional: Add a shortcut to your startup folder to start MyAHK automatically.

Updating

Steps to update to a new version of MyAHK.exe

1. Download the newest copy of MyAHK.exe.
2. Close MyAHK.exe (CTRL+ALT+BACKSPACE or end the process in Task Manager).
3. View the properties of the new MyAHK.exe and click **Unblock** if it is being blocked from running.
4. Copy the new MyAHK.exe over the old MyAHK.exe.
5. Once you run MyAHK.exe again you will be running the updated version.
